The Torkster Plus
EFI or CARB Kit

**Hot Rod Parts
for
Sportsters®!**

ZIPPER'S TORKSTER PLUS 1250 SPORTSTER® KIT for EFI or CARB MODELS

The Torkster Plus is similar to our original Torkster 883-1200 kit, but with a twist - *an additional 50cc with the inclusion of our exclusive 3-9/16" bore cylinders!* These extremely rigid aluminum cylinders are cast around ductile iron liners and fit right into the case opening without any machining. The Torkster Plus includes our highly refined cylinder, head and engine management package that promotes big gains in power and torque.

Also included is the blueprinting of your original cylinder heads. After cleaning, new Step-Lock guides are hand-fit to new, high-flow stainless steel valves. Next, the bowl in the port is aligned to the center of the valve using a special form tool that promotes high velocity for optimum air to fuel atomization ratios. The heads are delivered assembled with Viton® seals and a performance valve spring set; Zipper's aluminum cylinders are precisely fitted with lightweight, reverse-dome forged pistons. A complete top end gasket set is supplied with the kit.

On EFI models, the factory ECM is replaced with the versatile ThunderMax ECM with AutoTune, supplied with maps that ensure quick and accurate automatic AFR tuning. A Zipper's high flow air cleaner kit increases airflow to the throttle body.

On carbureted models, your carburetor is re-jetted and modified with our HPCV treatment for greater throttle response and overall drivability improvement.

The result is increased fuel efficiency, and in layman's terms, a big, fat, wide torque curve.
Get that extra edge with the Torkster Plus 1250 kit - excellent power right where you need it!

Send your carefully packed parts directly to Zipper's. The Torkster Plus kit requires modification to your customer's cylinder heads (and carburetor for '91-'06 versions). Your original 883 heads and carb are modified and returned to you with new cylinders and the rest of the kit, ready for installation. In-shop time is generally 1-2 weeks. Please pack your parts carefully!
