## Want Your Own Digital Information Center?

*With a ThunderMax Digital Speedometer Module, you can be informed!*

### The ThunderMax Digital Speedometer Module

**Have 10 Minutes? Then you have time to install the Digital Performance Speedometer Module on your bike.** Installation requires no special tools... just one fastener and one connector! The Digital Performance Speedometer Module brings multiple high performance features to your fingertips.

The ThunderMax Digital Speedometer takes place of your stock speedometer and performs normal speedo-odometer functions, *and a whole lot more!*

- Simple, two-button programming
- Digital display w/ speedometer, tachometer, odometer, trip functions and a programmable shift light
- Calculates HP, 0-60 time, fuel mileage and range
- Displays engine "vitals", such as cylinder head temp and battery voltage
- User-configurable alarms for speed, head temp and battery voltage
- Illumination automatically adjusts for day or night viewing.
- Illumination intensity is adjustable, too!
- For 2004-up EFI bikes with 5" speedometer console (Softails®, Road Kings®, Dyna® Wide Glides®, Fat Bobs®)
- Comprehensive instruction manual
- Displays live front/rear air/fuel ratios if bike is equipped with ThunderMax EFI and ThunderMax AutoTune module!

### We Get Responses Like This A Lot!

#### Q. How would you rate your over-all satisfaction with ThunderMax?

A. *GREAT!!! That's what I have to say, since I have installed the Thundermax with auto tune, I have no issues. I was so impressed with the product I figured I couldn't go wrong adding the digital speedo w/ tach and the advanced functions enabled when combined with the auto tune like head temp, front and rear air fuel ratios real time monitoring, 0-60 elapsed time and horsepower measurement. The digital display gets lots of attention where ever I go. Keep up the great products. Thanks!*
