# THUNDER MAX

EFI Made Simple.

## Building a Performance Big-Inch EFI Engine?

Zipper's ThunderMax EFI Throttle Body, Manifold and High Flow Air Cleaner assemblies provide the big airflow required for larger performance engines. These oversize CNC-machined castings replace the factory designs used on Delphi®-equipped '01 and later models, and are designed to accept the factory electronic components so assembly is a snap. Our ThunderMax High Flow Air Cleaner includes a CNC-machined billet backplate, 2-3/4" deep high flow filter, breather plumbing, heavy-duty support brackets, and fits all years of ThunderMax throttle bodies.

### ThunderMax 1-Pc Throttle Body / Manifold for '06-Up Cable Throttle Bikes

Throttle body and manifold are 1-piece, unit construction. Available in 54 and 60mm; high flow design requires ThunderMax air filter with spread bolt pattern. Manifold width available for most popular engine kits from 95" up to 124", with oversize (1.780" ID) intake port opening. Includes our billet intake flanges and seals. *Not for throttle-by-wire models.*

### ThunderMax Air Cleaner Kits for ThunderMax Throttle Bodies

Includes a CNC-machined, radius inlet billet back plate, 2-3/4" deep MaxFlow filter, breather plumbing and heavy-duty support brackets. The air cleaner has the wider ThunderMax throttle body bolt pattern and increases airflow capabilities for performance gains. Includes machining for MAT sensor relocation and block-off plate. Choose between two designs that accept either the stock Twin Cam® "football" cover or a round EV-style cover.
