## ThunderMax with AutoTune for XR1200's

**ThunderMax is a complete replacement engine management system that replaces the stock Electronic Control Module (ECM), not an add-on box or signal modifier.** The ThunderMax is a high speed, high resolution processor designed to deliver uncompromising performance. ThunderMax is simple to install, simple to use and delivers outstanding results.

**ThunderMax AutoTunes as you ride for...**

- Any riding condition!
- Any exhaust system!
- Your riding style!
- Optimum power and economy!

**Nothing compares to the power, performance and versatility of a ThunderMax.** Don't be fooled by marketing tricks. Other devices do not add up to the power and versatility of a ThunderMax.

**Don't take our word for it.** Read this article from Barnett's Magazine.
